Portfolio: https://v2-portfolio-website.netlify.app/projects

PROFESSIONAL SUMMARY

Detail-oriented Junior Web Developer with hands-on experience developing full-stack web applications using JavaScript, React.js, Node.js, Express.js, MongoDB, and REST APIs. Experienced in implementing JWT authentication, protected routes, CRUD operations, database integration, responsive user interfaces, and AI-powered applications using Retrieval-Augmented Generation (RAG). Demonstrates strong problem-solving skills, attention to code structure, and a continuous commitment to improving software development practices.

TECHNICAL SKILLS

Programming Languages: JavaScript, SQL, HTML5, CSS3
Frontend: React.js, Vite, Responsive Web Design
Backend: Node.js, Express.js, REST APIs
Database: MongoDB, MongoDB Atlas

PROFESSIONAL PROJECTS

E-Tanong AI — AI-Powered Inquiry Assistant

Personal Project | 2026

- Developed a full-stack AI inquiry assistant using React, Node.js, Express.js, and Google Gemini API.
- Implemented a Retrieval-Augmented Generation (RAG) pipeline using a PDF-based knowledge base, document chunking, embeddings, and context retrieval.
- Built a responsive conversational interface with React, Vite, and Tailwind CSS.
- Deployed the frontend and backend using Netlify and Render.

Technologies: React.js, Vite, Tailwind CSS, Node.js, Express.js, Google Gemini API, RAG, MongoDB, REST API
Github: https://github.com/janrelle24/ai-inquiry-assistant

CBR Information Management System

Personal Project | 2026

- Developed a full-stack information management system consisting of an administrative dashboard and public-facing website connected through REST APIs.
- Implemented JWT authentication, protected routes, and CRUD operations for managing news, events, ordinances, and member records.
- Designed MongoDB schemas and developed REST API endpoints for secure and dynamic data exchange between the dashboard and public website.
- Deployed the dashboard backend using Render and the public website using Netlify.

Technologies: JavaScript, HTML5, CSS3, Node.js, Express.js, MongoDB, JWT, REST API
Github:
Dashboard: https://github.com/janrelle24/crbDashboard
Website: https://github.com/janrelle24/cbrWebsite

Notebook App

Personal Project | 2025

- Developed a full-stack note-taking application with user authentication and protected routes.
- Implemented CRUD operations for creating, viewing, updating, and deleting notes.
- Integrated MongoDB and REST APIs using a modular Node.js/Express.js backend.

Technologies: JavaScript, Node.js, Express.js, MongoDB, JWT, REST API
Github: https://github.com/janrelle24/note

EDUCATION

Bachelor of Science in Computer Science

Caraga State University - Main Campus, 2023
