PROFESSIONAL SUMMARY

Junior Full-Stack Developer with a Bachelor of Science in Computer Science and professional experience working with real-world information systems and data at the Philippine Statistics Authority. Hands-on experience building and deploying full-stack web applications using React, Node.js, Express.js, Supabase and REST APIs. Built applications featuring JWT authentication, protected routes, CRUD operations, database integration, and an AI-powered Retrieval-Augmented Generation (RAG) system using the Google Gemini API. Currently seeking a junior software development role to apply full-stack development skills in a professional engineering environment.

TECHNICAL SKILLS

Programming Languages: JavaScript, SQL, HTML5, CSS3

Frontend: React.js, Vite, TailwindCSS Responsive Web Design,Indexed DB, PWA

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Database: MongoDB, MongoDB Atlas, Postgresql, Supabase

AI/ API: Google Gemini API, Retrieval-Augmented Generation (RAG)

Tools & Deployment: Git, Github, Netlify, Render

PROFESSIONAL EXPERIENCE

Philippine Statistics Authority (PSA)

Statistical Researcher | July 2024 - September 2024

- Conducted field data collection through interviews and surveys across assigned areas.
- Collected, reviewed, cleaned, and validated statistical data to improve accuracy and completeness.
- Worked directly with respondents to obtain reliable information and clarify incomplete or inconsistent responses.
- Organized collected data to support statistical research.

PhilSys Register Kit Operator | Nov 2023 - July 2024

- Operated PhilSys registration Software and biometric equipment to process National ID registrations.
- Verified applicant information and supporting documents to ensure accurate and complete registration records.
- Troubleshot registration software and equipment issues to minimize interruptions during registration activities.
- Assisted citizens throughout the registration process and provided guidance on registration requirements and procedure.
- Handled sensitive personal and biometric information while following established data-handling procedures.

SOFTWARE DEVELOPMENT PROJECTS

DevVault - Full-Stack Developer Documentation Hub | 2026

- Built a full-stack documentation platform using React, Node.js, Express.js, and PostgreSQL (Supabase).
- Implemented JWT authentication, email OTP verification, password reset, and role-based access control.
- Developed REST APIs for document management, categories, tags, bookmarks, and user activity.
- Implemented PWA offline access using IndexedDB and automatic bookmark synchronization.
- Applied security practices including bcrypt hashing, SQL parameterization, input validation, and rate limiting.

Live Demo: https://devvault-stack.netlify.app/

E-Tanong AI - AI-Powered Inquiry Assistant | 2026

- Built and deployed a full-stack AI inquiry assistant using React and Node.js with the Google Gemini API.
- Implemented a Retrieval-Augmented Generation (RAG) pipeline using a PDF-based knowledge base, document chunking, embeddings, and context retrieval.
- Developed a responsive conversational interface for interacting with retrieved knowledge and AI-generated responses.
- Integrated backend REST APIs.
- Deployed the frontend on Netlify and backend on Render.

Live Demo: https://e-tanongai.netlify.app/

Notebook App | 2025

- Developed a full-stack note-taking application with user authentication and protected routes.
- Implemented CRUD functionality for creating, viewing, updating, and deleting user notes.
- Built a modular Node.js/Express.js backend with MongoDB integration and REST APIs.
